Shouldn't grep be included in get_information.txt instead?

Write Preview

H B I

Hi,

You have included grep in the file basic_terminal.txt. Shouldn't this command rather be in get_information.txt?

1.) grep --after-context=8 "guacamole" salads.txt > avocado_love.txt
looks for guacamole in the file salads.txt and writes the following 8 lines to the file avocado_love.txt
stitched

Attach files by dragging & dropping, selecting or pasting them.

Styling with Markdown is supported

Issues

How to write issues

- be specific
- obs: line numbers can change and are not specific
- be kind
- always add the filename you are talking about
- only one topic per issue

Types of issues

- I don't understand xyz.
- There is a typo in xyz.
- Another useful command is xyz. You could include it like this xyz.
- How do you do xyz? Could you be so kind to include it in file xyz?

Forking

The screenshot shows the GitHub interface for the repository `m-thelen / octocat`. The repository is public and has 1 watch, 0 stars, and 0 forks. A red arrow points to the **Fork** button in the top right corner of the repository header. The repository has a `main` branch and 0 tags. The commit history shows three commits: `3082c42` (2 minutes ago, 2 commits), `Initial commit` (3 minutes ago), and `Create firstfile.txt` (2 minutes ago). The `README.md` file is displayed, showing the `octocat` logo. The right sidebar contains sections for **About** (No description, website, or topics provided), **Releases** (No releases published), and **Packages** (No packages published).

Forking

The screenshot shows the GitHub interface for a repository named 'ElkeF/octocat', which is a fork of 'm-thelen/octocat'. A red arrow points to the 'Code' button in the repository navigation bar. The page displays the repository's main branch, 'main', with 1 branch and 0 tags. It shows a commit history table with columns for the commit message, the commit time, and the number of commits. The commit history includes a commit by 'm-thelen' titled 'Create firstfile.txt' and two commits by 'ElkeF' titled 'Initial commit' and 'Create firstfile.txt'. The README file is visible, showing the word 'octocat'.

Reacting to a pull request

The screenshot shows a GitHub pull request page for the repository 'm-thelen / octocat'. The pull request is titled 'second verse #2' and is currently open. It shows a merge of 1 commit from 'ElkeF:main' into 'm-thelen:main'. The interface includes a navigation bar with tabs for Code, Issues, Pull requests (selected), Actions, Projects, Wiki, Security, and Insights. A green arrow points to a comment by 'ElkeF' that says 'another verse'. The right sidebar shows sections for Reviewers, Assignees, Labels, Projects, Milestone, and Linked Issues. At the bottom, a green box contains status messages: 'Continuous integration has not been set up' and 'This branch has no conflicts with the base branch'. A 'Merge pull request' button is visible at the bottom left.

✓ This branch has no conflicts with the base branch
Merging can be performed automatically.

Merge pull request or view command line instructions.

Reacting to a pull request

The screenshot shows a GitHub pull request page for the repository 'm-thelen / octocat'. The pull request is titled 'second verse #2' and is created by user 'ElkeF'. It shows a merge of 1 commit from 'm-thelen:main' into 'ElkeF:main'. The interface includes navigation tabs for Code, Issues, Pull requests (active), Actions, Projects, Wiki, Security, and Insights. Below the title, there are buttons for 'Open', 'Edit', and 'Code'. A summary bar shows 'Conversation 0', 'Commits 1', 'Checks 0', and 'Files changed 1' with a green bar indicating '+7 -0' changes. A 'Review changes' button is visible. The main content area shows the file 'firstfile.txt' with a diff view. The diff shows changes to the file, with line 9 being a new addition. The content of the file is a poem about a wonderful world.

Tasks Contributors

- 1 Fork the repository on my account
- 2 Clone your fork to your computer
- 3 Identify an issue for yourself
- 4 Write that you are going to take care of it
- 5 If necessary, discuss with the issue creator
- 6 Fix it in your local repository
- 7 Close the issue by using a keyword in the first commit line
- 8 Update your fork
- 9 Pull changes to your local repository, if necessary, solve conflicts
- 10 Push changes to your fork
- 11 Create pull request
- 12 Go through the list of pull request and perform code review on one of them.
If appropriate, merge, otherwise discuss.
Do not review anything that concerns a file, where you contributed.
- 13 Repeat from number 3
